### In an Emergency

In an emergency outside of our working hours all patients should phone the practice number and follow the instructions given.  
NHS patients can also phone the NHS Dental Helpline Number 111

Welcome to the Spring 2017 edition of our Practice newsletter. In this issue we will be informing you of any changes within the Practice and details of our latest services and offers available to you.

## NOW STOCKING

TAYLOR'S  
32 NATURAL TOOTHCARE

Our principle Dentist, Jonathan Taylor is proud to be stocking his son's flag ship toothpaste.

Taylor's 32 is a shiny and new dental healthcare company. Their mission is pretty simple: to create high quality and effective products made from natural ingredients, and that are free from harsh and unnecessary laboratory made chemicals. Breaking away from the clinical nature of the mainstream, they have made sure their products add a bit of zing to your routine, too.

This can be purchased from the Practice or Waitrose.

## ANTI-WRINKLE APPOINTMENTS

Olivia Nixon is currently offering Anti-wrinkle injections using Botox and Fillers. She offers a discrete service and takes time to understand what the patient wants to achieve, keeping an emphasis on natural results.

Botox is injected into the muscles of the face to help to reduce wrinkles that form from movement of the face over time. Popular treatments are frown lines, forehead lines and crow's feet.

Dermal Fillers restore volume lost from the aging process. These can be used to treat deeper lines, aging lips, and nasolabial folds amongst many other things.

Olivia Nixon is currently offering **free** consultations to discuss options, where she will take patients through procedures available and what to expect.

## ORTHODONTIC TREATMENT AVAILABLE

Suzette Mulder joined Savernake Dental practice in July 2016 taking over from our retired colleague Dr. Charles Cole.

Before joining us she worked in Hertfordshire and Cambridgeshire in specialist orthodontic practices from 2007 to 2016. She has treated more than 4000 cases successfully.

She is part of a small group of orthodontists in the UK who has recently been given the privilege to use the latest innovations in the Invisalign for Teens product.

The newest innovation is a functional appliance which forms part of the Invisalign Teen appliance to help advance the lower jaw in growing patients.

Suzette is extremely excited about this new technology as it has huge potential for future use of functional.

Advantages of the Invisalign Teen advancement aligners include:

1. Nearly invisible, comfortable and it does not affect speech as much as conventional TwinBlock appliances do.
2. Alignment of teeth can be done while the jaw is advanced which may shorten the overall treatment time
3. Patient compliance is better because patients find the appliance fit is more comfortable than conventional TwinBlock appliances.
4. No fixed braces which means nobody will notice you have braces.
5. No food restrictions, easy to keep your teeth clean, no discomfort, most patients experience no pain at all- very soft gradual forces are applied.

Suzette offers a full range of orthodontic treatments including Damon Fixed braces, conventional fixed braces and Invisalign for both Adult and Teen patients.

## Direct Access Hygienist Appointment

We now offer direct access Hygienist appointments. This means you can now see a hygienist on a private basis without being referred by your Dentist.

Get a Deep Clean and Fresher Breath at your convenience.
